### 📁 PROJECTS

**Parlor project of HCI :** An application that helps users to find parlors around their areas

**Tuzmo :** An e-commerce platform for artisans from all around the world to connect with classic art lovers and eventually sell their products to art lovers. Google map navigation is integrated to help customers find artisans near their location. They can chat with them to answer their queries. The online payment feature is there to enable customers to pay online. Customers can give reviews after buying products

**RateIT :** A movie rating website similar to imdb, which enables users to view ratings of movies, also they are able to give ratings after watching movies and TV shows.

**Automated Smart glasses :** For blind persons to detect hurdles, currency detection or path navigation.

**Admin dashboard for e-commerce :** A responsive dashboard for an e-commerce platform for admin which helps admins to manage all the Sellers, customers as well as products, ratings, etc. Unique chat feature to help admins communicate with sellers. A detailed statistics page with graphs and analytics to help the admin get a better understanding of the platform.
